

Decision-Level Explainability of Selective Multimodal Fusion

Protected probability ensemble (0.55 V21 + 0.45 V13) with validation-selected selective acoustic correction

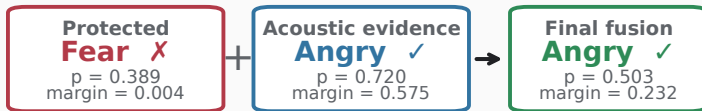

A Global selective-fusion behavior

Protected $\xrightarrow{+0.57 \text{ pp}}$ Final
88.57% $\rightarrow$ **89.14%**
310/350 correct 312/350 correct

Changed 3/350 • Corrected 2 • New errors 0
347 unchanged • 1 incorrect $\rightarrow$ incorrect

B Representative decision trace — 8_1_1_48

Ground truth: Angry

Selective rule triggered • protected error corrected

C Seven-class probability trace for the corrected sample
